Comment Space:

(Add additional pages if necessary)

1. Comments addressing Green-e Climate Protocol for Renewable Energy conformance with Green-e Climate Standard (please cite section of standard and the specific procedure/requirements in the endorsed program):

Comment regarding Item 5 under 3. Additionality Tests.

It is unclear why wood waste for power generation is excluded from this protocol? The science is clear that for every 1 bone dry ton of wood waste consumed to generate electricity, there is at least a net reduction of 1 ton of greenhouse gas emissions compared to a fossil fuel-fired powerplant.
