

# Climate

## Summary of Changes to the Green-e Climate Code of Conduct v6.3, October 2014

Section	Description
IV.A	Clarified that the project type categories for Program Participants are in the left-hand column of the table.
IV.A	Broke out “fuel switching” as its own project type category.
IV.A	Broke out “Landfill,” “Livestock,” and “Coal Mine” methane capture project types as separate project type categories. Previously these were rolled up within a broader “Methane Capture” project types. This means that Program Participants must now specify the type of methane capture project type being used.
IV.B.4	Changes to VCS project type categories corresponding with changes to IV.A above: methane capture project types are broken out separately.
V.H	Introduced new customer disclosure language for gas offset programs and products.
V.L.1.b	Added a recommendation to include the URL for the online Project List on the Offset Content Label. Corresponding changes to the sample Content Labels provided.
V.N.2.k	Introduced new customer disclosure language for gas offset programs and products.
X	Added definition for the term “Gas Offset Program or Product.”
