

Energy

Federal Option for Green-e® Energy Certification and Logo Use Agreement

This Federal Option for Green-e Energy Certification and Logo Use Agreement (“**Agreement**”) is made and entered into by and between the Center for Resource Solutions (“**Center**”) and the entity identified as Participant below (“**Participant**”), with effect as of the effective date provided by Center at the end of this Agreement (such date, “**Effective Date**”). In consideration of the mutual covenants and conditions contained in this Agreement and the documents incorporated herein, and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the parties agree to be bound by this Agreement.

This Agreement includes the following documents incorporated in this Agreement as if set forth herein:

- Appendix A: Federal Option for Green-e Energy Certification Terms and Conditions (available at http://green-e.org/getcert_re_federal.shtml)
- Appendix B: Green-e Energy Code of Conduct (available at <http://www.green-e.org/contract>)
- Appendix C: Certification Fee Structure for Green-e® Climate and Green-e® Energy (available at <http://www.green-e.org/contract>)
- Appendix D: Green-e Energy National Standard (available at <http://www.green-e.org/contract>)
- Appendix H: Green-e Logo Use Guidelines (available at <http://www.green-e.org/contract>)
- Appendix I: Green-e Glossary (available at http://www.green-e.org/learn_glossary.shtml)

Participant agrees that they have read and agree to comply with all posted Appendices. Initially capitalized terms used but not defined below have the meanings given in the Green-e Glossary.

This Agreement sets forth the terms and conditions related to:

- (1) Center’s certification requirements and verification processes (including those set forth in the Appendices) that Participant must comply with in order to participate in the Green-e Energy Certification program with a Federal Option product with respect to Participant’s renewable energy product(s) identified below (“**Product**”, or “**Federal Option**”); and
- (2) The right to use Center’s Green-e logo (in which Center has certain rights in the United States, Mexico and the European Union) in connection with Product meeting Center’s certification requirements and verification processes.

APPLICATION INSTRUCTIONS FOR APPLYING PARTICIPANT: PLEASE COMPLETE ALL APPLICABLE GREY-SHADED AREAS AND CHECK ALL APPLICABLE BOXES.

1. Application Process

In the US, Canada and parts of Mexico, Center currently administers the Green-e Energy Certification program under which Center provides certification services (including the use of Center's Green-e logo in accordance with this Agreement) to electric utilities, power marketers, and renewable energy certificate ("REC") marketers wishing to readily and publicly identify their products as meeting certain environmental criteria.

Green-e Energy has additional requirements stipulated for Federal Option products in Appendix A: Federal Option for Green-e Energy Certification Terms and Conditions pursuant to Federal Option product purchasing requirements. To qualify for Federal Option product base fee waiver, Participant must have at least one existing Green-e Energy certification ("Primary Product") consistent with the terms of this agreement. To apply for certification of a Product, Participant must deliver to Center a complete and executed copy of this Agreement in accordance with the instructions set forth herein. The application must include all required attachments and information as described below. Each Product is subject to fees as described in Appendix C: Certification Fee Structure for Green-e® Climate and Green-e® Energy. If Center finds the application to be complete and correct and the applicant passes the Center's "Know Your Customer" screen designed to prevent fraud, and applicant pays the applicable amount as described in Appendix C: Certification Fee Structure for Green-e® Climate and Green-e® Energy where required, Center may then accept Participant's Product into the Green-e Energy Certification program. Center will return one (1) countersigned copy of this Agreement to Participant. Participant's acceptance into and continued participation in the Green-e Energy Certification program is subject to each Product meeting the requirements set forth in this Agreement and all Appendices, including, but not limited to Appendix A: Federal Option for Green-e Energy Certification Terms and Conditions, Appendix B: Green-e Energy Code of Conduct, and Appendix D: Green-e Energy National Standard.

As a participant in the Green-e Energy Certification program, Participant will be notified of Center's verification and compliance procedures for the Product (including Center's marketing compliance review) and will receive access to Center's online verification tool. Participant will use the tool, or if requested, manually submit materials required by Center's verification and compliance procedures (including as described in Appendix B: Green-e Energy Code of Conduct), and will otherwise respond to Center's request for disclosures in a timely manner. Verification for the Federal Option product includes additional steps, beyond those of traditional Green-e Energy products and may require additional documentation of customers, customer disclosures or other data and documentation to be determined by Green-e.

2. Participant Information

Participant's Primary Contact Information

Participant Name:	
Affiliated companies¹:	
<i>Main Contact Person:</i>	Address:
Phone:	
Fax:	
E-mail:	Participant Website address:

Additional Contact Information (if different from above contact information)

Advisory Committee Contact ² :	
<i>E-mail:</i>	Phone:
Verification Contact:	
<i>E-mail:</i>	Phone:
Communications/Marketing Contact:	
<i>E-mail:</i>	Phone:
Contact for Invoicing:	
<i>Email:</i>	Phone:

If the contacts listed are not the permanent contacts, or if you have additional information about anticipated changing contacts, please provide that information here:

Requested Certification Start Date (subject to confirmation by Center):

¹ Affiliated companies do not have the right to use the Green-e Logo. The Center requests this information to ensure that the most appropriate company signs the agreement and is under contract.

² To learn more about the Advisory Committee, see http://www.green-e.org/about_who_gov_ac.shtml

³ This will often be the individual who acts as the main client relations contact for large commercial purchasers. To learn more about Green-e® Marketplace, see <http://www.green-e.org/marketplace> or contact a Green-e® staff member.

Nature of Business:

Participant's Product Name (how it will be marketed to customers):

(Note: this should not have the words "Green-e" or "certified" in it.)

Other Products of the Participant that are currently part of the Green-e® Energy Certification program (if any):

Certification Categories for Green-e Energy Federal Option product:

It is the responsibility of the Participant to ensure that each transaction meets the terms and conditions of this agreement. Green-e Energy will verify all transactions during its annual verification process, which takes place the year after the year of sale. If it is determined through the verification process that a mix does not meet the eligibility criteria or disclosure requirements, it will be the responsibility of the Participant to take corrective action to bring this transaction into compliance with the Green-e Energy National Standard and the Federal Option for Green-e Certification Terms and Conditions.

Participant must offer the Product to government, commercial and/or wholesale customers only, except in the case of a federal agency purchasing the Product on behalf of a group of residential customers, such as in the case of a military base where residents have their utility bills covered by their employer.

Competitive Electricity (RECs and electricity sold together):

Regional Electricity Multiple Mix (100 Non-Residential and/or Wholesale Mixes): This category covers certification of up to 100 unique mixes of eligible resources. Each mix can be used for an unlimited number of non-residential sales. Resources can be sourced from facilities across multiple states, regions or service territories as long as each individual mix meets the geographic eligibility criteria outlined in the Green-e Energy National Standard and Federal Option for Green-e Energy Certification Terms and Conditions.

Renewable Energy Certificates (RECs sold separately from electricity):

A Renewable Energy Certificate (REC) product is one that only includes the environmental and social attributes of renewable energy generation and does not include the delivery of electricity. A REC Multiple Mix Product (100 Non-Residential Mixes and/or wholesale) covers certification of up to 100 unique mixes of eligible resources. Each mix can be used for an unlimited number of non-residential sales. Resources can be sourced from facilities across multiple states, regions or service territories as long as each individual mix meets the geographic eligibility criteria outlined

in the Green-e Energy National Standard and Federal Option for Green-e Energy Certification Terms and Conditions.

REC Brokers

REC Broker Certification (Unlimited Transaction Mixes): This certification category covers certification of brokered transactions between generators and end-use customers only. Participant hereby agrees to obtain consent and cooperation from seller prior to completion of each brokered Green-e Energy certified transaction, in order to comply with all terms and conditions of this Agreement. Participant hereby agrees and understands that they will need to obtain certain information from seller in a brokered transaction in order to comply with this Agreement.

Utility Green Pricing (regulated utility selling RECs and electricity together)

Certification of utility green pricing programs is available in the United States for renewable energy products that are offered in regulated markets and meet Green-e Energy program requirements. In addition, utilities that offer green pricing programs to customers in conjunction with other local utilities can be certified under a single contract. In such a model, often called a "Hub and Spoke" model, there is a central body (hub) that develops a renewable energy product that is marketed by more than one utility (spokes). For example, the output of a wind turbine, a landfill gas facility, and a solar array could be bundled into one product and sold by all of the members of a transmission and distribution cooperative. Since there is a single product and a single point of contact (the hub), Center is willing to treat this as one certification regardless of the number of vendors selling the product so long as they meet all of the conditions outlined in the Green-e Energy National Standard.

Participant is applying for certification for the following Product:

(check one below)

- Green-e Federal Option for Competitive Electricity Product
- Green-e Federal Option for Renewable Energy Certificate (REC) Product
- Green-e Federal Option for Regulated Utility Green Pricing Product
- Green-e Federal Option for Brokered sales of Certified Renewable Energy Certificates or Certified Renewable Energy

Green-e Energy Certification Requested:

- First Product (New Customer with no other eligible Green-e Product)
- Green-e Federal Option product ("Secondary Product" or "Federal Option") in addition to existing Green-e Energy Certified Product ("Primary Product")

Green-e Energy Product Certifications [List all existing certified products that apply]

**CONTACT GREEN-E ENERGY STAFF FOR ASSISTANCE [determining current product eligibility for base fee waiver]*

Please Include:

- **Name of Product**
- **Type(s):** Multiple Mix (MM) or Single Mix (SM)
- **Categories:** i.e. Competitive Electricity, Renewable Energy Certification (REC), Utility Green Pricing (UGP),
- **Effective Date(s) and/or Signature Date(s)**

PRODUCT NAME	PRODUCT TYPES (MM or SM)	CATEGORIES (Competitive Electricity, REC, UGP)	EFFECTIVE/ SIGNATURE DATES:

Participant sells or intends to sell or broker Product to:

(select all that apply)

- Federal Government Department and Agency Customers
- Commercial Customers
- Wholesale Customers

Describe your corporate ownership or entity structure. Which entity owns the RECs?
Which entity subsequently retires the RECs?

List all countries where Participant has operations (headquarters, manufacturing, facilities):

If selling a competitive electricity or green pricing product, list the locations where the certified Product will be available (include the name of the state, district, territory, or protectorate if serving the entire state, district, territory, or protectorate, otherwise list zip codes). If selling a REC product provide available information if your service territory is limited:

For Competitive Electricity and Utility Green Pricing Products, is your service territory for the Product located entirely within one NERC Region / ISO / RTO or Balancing Authority? If yes, please list the applicable states. If not, please explain.

List the renewable tracking systems you plan to use (if any) and indicate if you have an account in that system:

If known, please list any facilities that you expect will supply the Product. Please include the facility location(s), date(s) the facility came on-line, type(s) of facility, and fuel source used, as applicable

Facility Name:	EIA #	Facility Location (state or province)	On-line date	Fuel Source / Type of Facility
_____	_____	_____	_____	_____
_____	_____	_____	_____	_____
_____	_____	_____	_____	_____
_____	_____	_____	_____	_____
_____	_____	_____	_____	_____

Will you employ a distributed marketing model, or multi-level marketing? _____(yes/no)
 Please note that Participants must retain full control of all marketing materials. Products cannot be advertised on affiliated websites, and all marketing materials must be approved by the contract holder. All subscriptions must occur through a subscription process controlled by the Participant.

Participant sells or intends to sell Product through the following sales channels:

(select all that apply)

- website
- physical mailing
- responding to requests for proposals
- telephone
- in person
- other – please describe _____

1. Required Attachments and Information for All Product Types

The following information is required for any Product that Participant wishes to be certified by Center. Please provide the Center with the information listed below, and confirm disclosure to Center by checking each box below.

- A brief description of the marketing plan for Product

- A sample of the Product Content Label⁴
- A completed copy of the Product Price, Terms and Conditions⁵
- Customer enrollment toll free number or phone number of sales department a prospective customer should use: _____

2. Additional Application Process for Utility Green Pricing Products Only

Participants offering Utility Green Pricing Products must submit the materials required below, which will be shared with selected stakeholders in the state(s) served by the utility for a 21-day comment period followed by a review by the Green-e Governance Board. Stakeholders selected by the Center will be notified by email of a 21-day comment period. Stakeholders include utilities, regulators, renewable energy advocates, and consumer and environmental protection interests who support the creation of green pricing programs by utilities in the relevant state(s). Any interested stakeholder is welcome to comment, and Green-e Energy will encourage stakeholders to circulate the information to any other interested parties for comment. These submitted application materials will also be posted on the certification section of the Green-e website (http://www.green-e.org/getcert_re_cert.shtml). During and after the stakeholder comment period, the Center will inform Participant of significant Stakeholder concerns and Participant will be given the opportunity to respond to any stakeholder comments.

After the 21-day stakeholder comment period, Green-e Energy staff will forward your application materials, any stakeholder comments and your responses to those comments, to the Green Pricing Subcommittee. If issues are raised by the Subcommittee during that time, this may trigger review by the Green-e Governance Board. Certification will be subject to the approval of the Green-e Governance Board.

Please provide Center with the information listed below, and confirm disclosure to Center by checking each box below.

- A brief (1-2 page) summary indicating how the Product meets Green-e Energy certification criteria.
 - Please indicate the price of the product per kWh: _____
- The product will be sold in:
- blocks of _____ kWh per month
 - percent of the customer's monthly energy use (please describe) _____
 - other (please describe) _____

⁴ Please note that the Product Content Label must disclose to Participant's customers a percentage breakdown of the resources in Participant's Product, as well as certain geographic information (e.g., the state or states of generation). Generation date by quarter and year is required to be disclosed to the customer at the time of sale. Sample Product Content Labels are available. Please contact Green-e Energy staff if you would like assistance preparing these documents.

⁵ Additional information on Product Price, Terms and Conditions may be found in Appendix B: Green-e Energy Code of Conduct. Please contact Green-e Energy staff if you would like assistance preparing these documents.

Please confirm whether this tariff has received regulatory approval or if it is in the process of obtaining approval, or if not, describe why:

Please specify the number of electric meters that your utility serves that will have access to this Product:

Will marketing for the Product use the hub and spoke certification model, as outlined in Section V.E. of Appendix D: Green-e Energy National Standard? Yes No

Participant agrees under the hub and spoke model, Participant is responsible for ensuring that the certified product and the marketing and sales of each spoke are in compliance with all terms and conditions of this Agreement including all appendices. If you selected “yes” above, attach a list of the participating spoke utilities along with appropriate contact information and webpages for each spoke. Please notify Green-e Energy staff of any change(s) to this list of spokes within thirty (30) days of the change(s) being made.
