Green-e® Energy Certification Application

Green Promise Overview

Entergy Arkansas is pursuing Green-e® Energy Certification for Green Promise, their newest utility green product in the state of Arkansas. Green Promise, after receiving approval from the Arkansas Public Service Commission, is offering subscriptions to the electricity and RECs generated by their Chicot Solar and Searcy Solar facilities. Subscription option 1 may be purchased by customers for $6.25/kW (monthly), with a minimum purchase quantity of .5 kW. Subscription option 2 may be purchased by customers for $6.01/kW (monthly) for a 1-year term escalating to $6.61 per kW/month for Year 10, and $6.25 per kW/month for all subsequent years. Customers may subscribe up to 90% of their prior 12 months kWh usage via two subscription options. Green Promise customers may elect to subscribe accounts to a minimum of 0.5 kW of available capacity and additional capacity in 0.5 kW increments, so this product offering meets the enrollment level specifications laid out in the Green-e® Renewable Energy Standard for Canada and the United States.

At this time, Entergy Arkansas is seeking certification for Green Promise which meets the requirements outlined in the Green-e® Renewable Energy Standard for Canada and the United States (the “Standard”) and the Green-e® Energy Code of Conduct for Canada and the United States, as highlighted below.

- **New Renewables**: Chicot and Searcy Solar (the facilities providing RECs for this product) came online in 2020 and 2021, respectively, easily meeting our threshold for new renewables.
- **Renewable Energy Credit (REC) Tracking**: The RECs generated from the facilities, as set forth in the Standard, will be tracked in NAR. Entergy Arkansas will then retire these RECs on behalf of Green Promise customers, ensuring that RECs are not double-counted or used for RPS compliance.
- **Verification Audit**: Entergy Arkansas will follow standard Verification Audit procedures, including the use of a third-party auditor (or Certified Internal Auditor.)
- **Marketing Compliance Review (MCR)**: Entergy Arkansas will be participating in the annual MCR where the Center for Resource Solutions (CRS) staff confirms that Entergy Arkansas is not making false or misleading statements about their product and that they have made pricing, power, and contract disclosure to customers in a standardized format. In addition to the MCR, Entergy Arkansas is submitting the program marketing materials to CRS to review in advance of the program launch.

RPS Requirements: Entergy Arkansas is not required to meet any state or federal Renewable Portfolio Standard (RPS) requirements, legislation, or settlement agreements.
### Price, Terms, and Conditions

Entergy Arkansas’ Green Promise is Green-e Energy certified, and meets the environmental and consumer-protection standards set forth by the nonprofit Center for Resource Solutions. Learn more at [www.green-e.org](http://www.green-e.org).

<table>
<thead>
<tr>
<th>Company:</th>
<th>Entergy Arkansas, LLC (a subsidiary of Entergy)</th>
</tr>
</thead>
</table>
| Whom should I contact for more information? | 1-800-ENTERGY  
[https://renew.entergy.com/arkansas](https://renew.entergy.com/arkansas) |
| What is the contract length? | Green Promise Option 1 has an initial one-year contract term, which renews automatically on an annual basis unless terminated.  
Green Promise Option 2 has an initial ten-year contract term, which renews automatically on an annual basis unless terminated. |
| How much will Green Promise cost? | Green Promise includes two pricing options for subscribing customers:  
Green Promise Option 1:  
Subscription Charge: $6.25 per kW/month, no escalation  
Subscription Credit: $0.029/kWh escalating at 2% annually  
Green Promise Option 2:  
Subscription Charge: $6.01 per kW/month for Year 1, escalating to $6.61 per kW/month for Year 10, $6.25 per kW/month for all subsequent years  
Subscription Credit: $0.029/kWh escalating at 2% annually |
| Will my rates change over time? | The subscription charges and credits are fixed and approved by the Arkansas Public Service Commission (APSC). Any change to the rate would require approval from the APSC. |
| What are the enrollment options? | Customers may subscribe up to 90% of their prior 12 months kWh usage via two subscription options:  
Green Promise customers may elect to subscribe accounts to a minimum of 0.5 kW of available capacity and additional capacity in 0.5 kW increments. |
<p>| What other fees might I be charged? | There are no additional fees associated with Green Promise. Customers must pay all applicable Entergy Arkansas rate and rider schedules, federal, state, and local taxes and charges. |</p>
<table>
<thead>
<tr>
<th>Question</th>
<th>Answer</th>
</tr>
</thead>
<tbody>
<tr>
<td>How will I be billed?</td>
<td>Green Promise will be billed as a separate line item on the customer’s monthly Entergy Arkansas billing statement in addition to all applicable rate and rider schedules.</td>
</tr>
<tr>
<td>Can I cancel my participation?</td>
<td>Yes. Participation in Green Promise may be terminated by written notice given by not more than six months nor less than two months prior to the expiration of the original term or any anniversary thereof.</td>
</tr>
<tr>
<td>If I want to terminate this agreement/contract, what is the early termination fee?</td>
<td>If a customer elects to discontinue service under Green Promise during the initial ten-year term of the Agreement, then a termination payment will be required for each account that is discontinuing service under Green Promise. The Company will determine the termination payment by multiplying ten (10) percent times the remaining aggregate Option 2 Subscription Charge for the remainder of the initial ten-year term of the Agreement for the account(s) that are discontinuing service under Green Promise. If the customer can and does elect to assign the subscription to another existing account, the termination payment will not apply.</td>
</tr>
<tr>
<td>What is a REC product?</td>
<td>Green Promise retires the Renewable Energy Certificates (RECs) associated with the program’s renewable energy on behalf of subscribing customers. A REC represents the environmental benefits of 1 megawatt hour (MWh) of renewable energy that can be paired with electricity. For more information, see <a href="https://www.green-e.org/long-rec-disclosure">https://www.green-e.org/long-rec-disclosure</a></td>
</tr>
</tbody>
</table>
**2023 HISTORICAL PRODUCT CONTENT LABEL**

Green Promise is a Renewable Energy Certificate (REC) product and does contain electricity. A REC represents the environmental benefits of 1 megawatt hour (MWh) of renewable energy that can be paired with electricity. For more information, see: www.green-e.org/rec.

Green Promise is sold in blocks of 0.5 kilowatt- (kW). In 2022, Green Promise was made up of the following renewable resources.

<table>
<thead>

<tr>
<td>TOTAL</td>
<td>100%</td>
</tr>
</tbody>
</table>

1. These figures reflect the resource mix of the RECs delivered to Green Promise’s customers in 2023.

2. New Renewables come from generation facilities that first began commercial operation within the past 15 years.

For comparison, the current average mix of resources supplying Entergy Arkansas includes: Coal (6.5%), Nuclear (64.4%), Oil (0%), Natural Gas (22.8%), Hydroelectric (0.6%), Solar (2.7%) and Other (3.0%). This resource mix was prepared in accordance with Entergy Arkansas’ approved Integrated Resource Plan.

The average home in Energy Arkansas’ territory uses 1,109 kWh per month. Source: U.S. EIA, 2021

Supporting Documents for Green Pricing Certification

Companies offering Green Pricing product must submit the materials required below, which will be shared with stakeholders in the state(s) served by the utility for a 21-day comment period.

1 You may list more than one contact to be on the Power Marketers Advisory Committee/Utility Green Pricing Advisory Committee. Quarterly calls to discuss program and market developments are held with these groups. To learn more about PMAC and UGPAC, see www.green-e.org/who

2 This will often be the individual who acts as the main client relations contact for large commercial purchasers. To learn more about Green-e® Marketplace, which is a program to help promote your clients' purchases and claims, see www.green-e.org/marketplace or contact a Green-e® staff member.
period followed by a 10-day review and comment period by the Green-e® Governance Board. Stakeholders will be notified by email of a 21-day comment period. Stakeholders include utilities, regulators, renewable energy advocates, and consumer and environmental protection interests who support the creation of green pricing programs by utilities in the relevant state(s). Any interested stakeholder is welcome to comment, and Green-e® Energy will encourage stakeholders to circulate the information to any other interested parties for comment. These submitted application materials will also be posted on the Green-e® website. During and after the stakeholder comment period, you will be given the opportunity to respond to any stakeholder comments.

Certification will be subject to the approval of the Green-e® Governance Board. After the 21-day stakeholder comment period, Green-e® Energy staff will forward your application materials, any stakeholder comments and your responses to those comments (if any) to the Green-e® Governance Board. The Green-e® Governance Board will have ten days to reply. If no Board comments are received during that time, the item is deemed approved. If issues are raised by the Board during that time, this may trigger a separate meeting to resolve them.

Please submit the following for CRS review and approval:

**Program Information**

1. A brief (1-2 page maximum) program summary indicating how the Green Pricing Program meets the Green-e® Energy criteria.

2. Customer enrollment toll free number: _____

3. Customer enrollment website URL: _____

4. Please indicate the price of the product per kWh: _____

5. The product will be sold in:
   - [ ] blocks of ____ kWh per month
   - [ ] percent of the customer’s monthly energy use
   - [X] other (please describe below)
   - KW

6. A sample of the Price, Terms and Conditions you will provide to customers regarding the proposed Green-e® Energy certified product.¹

7. This tariff has received regulatory approval (if applicable): [X] yes [ ] no [ ] not applicable

**Marketing Plan**

8. Number of meters that utility serves that will have access to this product: 124,438

---

¹ For more information on the requirements of the Price, Terms and Conditions, please see Green-e® Energy Code of Conduct for Canada and the United States.
9. List states where product will be marketed as “Green-e® Energy Certified”: **Arkansas**

10. Attach a brief description of the marketing plan for Product, including how the product will be sold (sales channel) and advertised (marketing channel):  **Website, physical mailing, telephone, customer newsletter/emails/verifications**

11. Will product utilize the hub and spoke certification model, as outlined in Section V.E. of the **Green-e® Renewable Energy Standard for Canada and the United States**?  
   - [ ] Yes  
   - [x] No

   *If you selected “yes” above, please attach a list of the participating spoke utilities along with appropriate contact information for each spoke. Please notify Green-e® Energy staff of any change(s) to this list of spokes within 30 days of the change(s) being made.*

**Product Content**

12. Attach a description of the facility(ies) that you expect will be used to supply this product, including, at a minimum, the facility location(s), date(s) the facility came on-line, type(s) of facility, and fuel source used (if applicable):  **Chicot Solar EIA#63295 Arkansas online date 09-29-2020 Solar**  
   **and Searcy Solar EIA#62617 Arkansas 11-10-2021 Solar**

13. Attach a Product Content Label in the format you intend to use for distribution to your customers. Sample Product Content Labels for Green Pricing Products are included in Table 1 and Table 2 of the **Green-e® Energy Code of Conduct for Canada and the United States**, available at **Green-e® Energy Documents**.
Green Promise is a voluntary tariff that provides customers with the opportunity to access renewable resources. It is available to commercial customers. The total amount of capacity currently available under Green Promise is 100 MW and customers may subscribe up to 90% of their most recent annual billed kWh usage, provided there is capacity available. As a subscriber to the tariff, a customer will pay a monthly subscription fee in exchange for a variable credit based on the output of the renewable resource. Customers will also receive the renewable energy credits associated with their subscription. These renewable energy credits will be retired by Entergy Arkansas on behalf of the subscribing customer. Green Promise has two options. Green Promise Option 1 offers a flat subscription rate that requires a 1 one-year contractual commitment. Green Promise Option 2 offers a subscription rate that is lower on the front end of the contract and increases over time and requires a 10-year contractual commitment.
